

B-HIVE MOBILE

ENABLE THE HYBRID WORKFORCE

The research is clear: a hybrid workplace is the future. In the highly competitive and often underserved small to medium business (SMB) market, flexible working arrangements are the expectation, not a luxury. Fail to adapt to this trend, and your business may fall behind the competition in the ability to attract and retain talent.

Even if your business is not mobile by nature, you still need a solution that is flexible enough to meet your needs as they evolve.

With the b-hive Mobile app^{*} from Broadvoice, all of your business communications are available in the palm of your hand. Call and text using your business number. Stay connected with team messaging. Host and join video conferencing. Plus get all of the features and services you need to stay productive when you are away from the office.

There's no need for the hassle of company provided phones. The b-hive Mobile app is available on the devices your team already has, delivered reliably and securely from the cloud.

MOBILITY IS HERE TO STAY

80%

The majority of the US workforce does not sit all day at a desk.

82%

Employees want the ability to work remotely at least once per week.

85%

Most Americans use a smartphone for their personal use.

67%

Workers already use personal devices for work regardless of formal policy.

^{*} Available for iOS and Android devices.
