

INTRODUCING STORNEXT 7 ON THE QUANTUM H4000 SERIES

Need to Harness the File System Trusted by Content Creators?

Now, it's easier than ever to ingest, manage, collaborate, and deliver work faster and take advantage of the power of StorNext® 7. The latest version of the world's leading file system is now available on a new platform that is easily deployed on set, at the edge, and in remote locations.

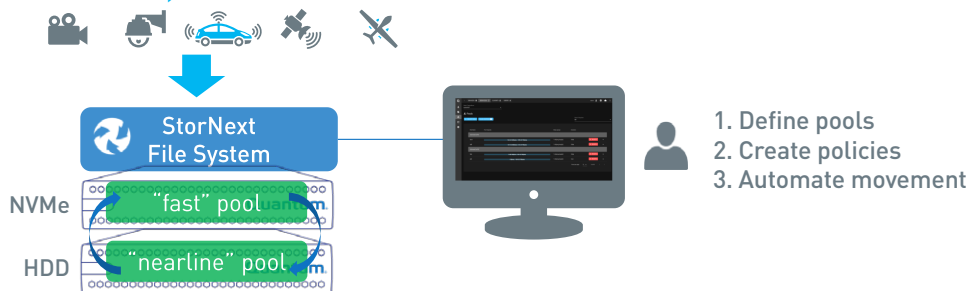

ABOUT STORNEXT 7

The software-defined architecture of StorNext 7 is a major step forward, enabling public and hybrid cloud deployments in more places than ever. With sophisticated storage pooling options, a unified interface for easy administration, and a simple, pay-as-you-go subscription and support model, your shared workflow goes everywhere you need it.

StorNext 7 File System Pools

StorNext 7 introduces [File System Pools](#) that allow you to define pools of storage that fit your workflow or performance needs across different storage types, and highly optimized for NVMe. Administrators can create policies or jobs to shift files automatically and on the fly seamlessly between the pools by file type or by date.

HIGH-THROUGHPUT, LOW-LATENCY WORKLOADS

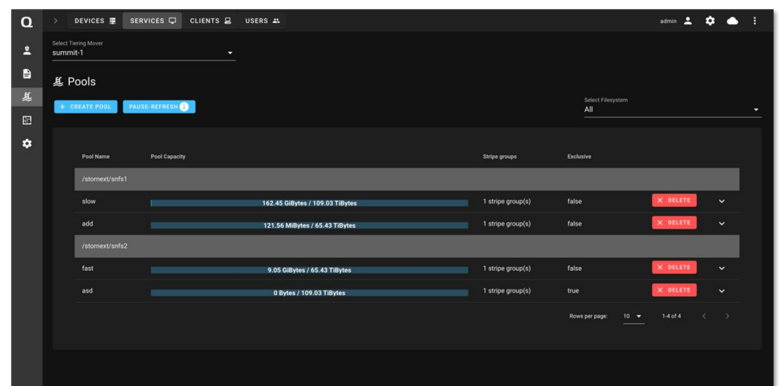

StorNext File System

Pools allow you to adopt cutting-edge NVMe storage to break through your performance bottlenecks, and accelerate your production workflow.

Simplified User Interface

The dramatically simplified and unified interface in StorNext 7 allows you to manage more of your StorNext environment in one place for maximum productivity. Now, you can manage H-Series storage systems directly from the StorNext 7 user interface, and performance charting and graphing capabilities with numerous reporting and export options.

All-Inclusive Subscription-Based Licensing Model

Quantum made it simpler to own and use all of StorNext's powerful features and capabilities with its latest release, StorNext 7. Separate and distinct licenses for clients and features are now replaced by a simple, capacity-based, dollar-per-terabyte-per-year subscription model that includes all features and clients for the file system.

ABOUT THE QUANTUM H4000 SERIES

The Quantum H4000 Series is a line of compact high-performance storage appliances for hosting the StorNext 7 File System. It leverages the latest StorNext 7 software-defined architecture, which dramatically simplifies the StorNext user experience and enables easier and more flexible deployment options.

In this new software-defined architecture, StorNext 7 file services, data services, and block services run virtually on a single platform. StorNext 7 has been virtualized, and significant architectural components such as the management layer and APIs, have been containerized in a Docker environment.

POWERFUL HARDWARE DELIVERS BEST PERFORMANCE AND VALUE

By pairing this software-defined architecture with powerful computing architecture standards like PCIe 4, an entire StorNext environment can be consolidated into a very small footprint, simplifying management and administration.

The H4000 Series is available in two server form factors, a 2U12 and 2U24 that support different SSD and HDD storage types, and the H4000 Series can be scaled up using optional JBODs.

NOW IS THE TIME TO REFRESH

With the new capabilities in StorNext 7, a dramatically simpler user experience, and a more efficient platform with the Quantum H4000, there has never been a better time to refresh your shared storage environment. Use StorNext 7 to take your remote workloads to the edge, to the set, or to any remote location—where high-speed ingest, processing, and data management are critical.

Refresh your workflow with StorNext 7 today.

Quantum

Quantum technology and services help customers capture, create, and share digital content—and preserve and protect it for decades at the lowest cost. Quantum's platforms provide the fastest performance for high-resolution video, images, and industrial IoT, with solutions built for every stage of the data lifecycle, from high-performance ingest to real-time collaboration and analysis and low-cost archiving. Every day the world's leading entertainment companies, sports franchises, research scientists, government agencies, enterprises, and cloud providers are making the world happier, safer, and smarter on Quantum.
