

Managed Power

Powered by: **datto**

From phone systems and point-of-sale devices to routers and UC servers, your business relies on technology that must stay online. Power interruptions, costly site visits, and inefficient troubleshooting put that at risk and drain time, money, and resources.

Keep Your Infrastructure Running

Sangoma's Managed Power delivers cloud-managed visibility and control over your power infrastructure. Automate device reboots, prevent downtime, and cut expensive truck rolls while integrating with Sangoma's UC, connectivity, and security solutions.

Benefits of Always-On Power

- **Stay connected:** Keep communications and networking systems online with automated remediation and proactive monitoring
- **Lower IT expenses:** Reduce expensive on-site visits with remote management
- **Simplify operations:** Centralized control makes managing devices fast, easy, and scalable
- **Support sustainability:** Monitor and optimize energy use to cut costs and meet environmental goals
- **Protect your investment:** Built-in surge protection safeguards critical hardware

Where Smart Power Meets Smart Networks.

Use Cases

Multi-site businesses: Maintain uptime across locations without costly IT visits.

SMBs & mid-market: Empower lean IT teams with simple, scalable remote management.

Healthcare, retail, hospitality, education and manufacturing: Avoid downtime that impacts customers, patients, or staff.

Sustainability-focused organizations: Optimize energy use and cut costs.

Key Features

Flexible 6-outlet or 14-outlet units for any environment

Per-outlet metering and detailed energy insights

Cloud-based monitoring and management

Automated device management (scheduled cycles, ping monitoring)

Integrated with Sangoma's UC, networking, and security services

Simple procurement and Sangoma's award-winning support

Why Sangoma?

By choosing Sangoma Managed Power, you're not just solving a power problem—you're strengthening your entire communications stack. Adding Managed Power alongside your Sangoma UC, connectivity, or security solution means:

One trusted provider

One integrated solution

One support team

**Take control of power, reduce downtime,
and protect what matters most!**
